## ABSTRACT

*During the different period of architectural design, designers attempt to achieve high level of life quality for all users. Architecture and urban planner want to provide a style of design which not only achieves different function for different users with respect to their ethnicity, ability, age, sex, capability, position, and life style but also improve friendly environment throughout responsive legislation based on long-term planning. Although, the styles are considered some indicators, it is ignored the other important characteristics. Therefore, the existing styles never achieve standard level of satisfaction of different people. The goal of the research is to introduce meta-postmodern style as supplement stylistic approach. The style tries to consider all important indicators that create a strategic long-term planning for different generations. Various characteristics of new style can be applied to improve the quality of human life and provide a health, livable and sustainable planning for all users.*

## 1. Introduction

During the last decade, most of cities have created the common problems for nations and future generation. Ozay (2005) mentioned cities always are the heart of civilization and vitality. Designers are able to reflect civilization by considering cultural, environmental, economic, social and technological characteristics of the society. Architecture is a combination of art and science for designing building and environment and it can give proper expression to the personalities and social status of people (Able, 1997). However, according to Heynen & Henket (2002), industrial revolution invites our world to the new era that the revolution also has significant

influence on the architectural trend. Modern style has arrived to design and architecture. New technology and high speed access to all sciences and knowledge are the major cause to change life perception as well as architecture design. Consequently, modern architecture was faced with controversial trend because this style had been ignored many characteristics which have deep effect on quality of human life. Although, there are many benefits in being adapted with the
