ABSTRACT

The article is devoted to researches on thematic groups of lexical units of "Qisas-i-Rabguzy", which treats to the XIV century. Also considers the relation of words to various disciplines, their origin, primordial or borrowed character, spheres of use. Such dividing the words to the thematic groups is a convenient method of the systematical studies of dictionary structure. Also in article is given the assessment to a historical and current state of the language, promoting disclosure of history of language.
